

COASTAL LINES IN THE RELATIONS WITH INLAND AREAS

1st International Summer School
Cefalù and Petralia Soprana, 1st-6th September 2010

ANNOUNCEMENT

General framework of the issues, purpose and objectives

Over the past two decades many countries have been confronted with what has been the phenomenon known generically by the term globalization phenomenon that has generated undoubtedly progress in the production field, economic and technological but in many cases had negative findings in the local scale. The speed and force of the changes generated also did not allow the necessary local adaptation, especially in those regions more marginal than in countries that are driving the dominant development model, just as the Mediterranean area, which are found not adequately equipped for these changes.

This situation has certainly exacerbated imbalances already very strong at the level of production and local knowledge and often led to the adoption of reference models "external" unrelated to the specific identity of the more marginal areas, so to make perception of our local values (especially in young people) as a value that does not affect significance when compared with international social and economic context that today runs the development.

This perverse mechanism is leading to a progressive weakening of the collective memory of the cultural heritage of many land and urban areas, a specific provision of real resources (increasingly set aside) to a general feeling of powerlessness in relation to local media if compared to trans-national market increasingly disconnected from the "place" physical and to an excessive "magnetism" exercised by large cities and coastal areas.

With the loss of full consciousness of our own heritage, they will fail the foundations of the value of place and this will inevitably lead to further pressures to abandon the native place to seek work and opportunities for growth "outside", thereby strengthening In this way, the phenomenon of depletion of internal areas and the congestion of coastal areas and large urban conurbations, worldwide.

The International Summer School 2010 is intended to identify those specific actions are possible, for the home, the city and the territory, which can help to combat the phenomenon of de-territorialization economy and abandonment of the place favouring, instead, the recovery of the territory through the development of the themes identified and that will be dealt with during training activities and application.

Problems, objectives and themes that were identified are intended to strengthen and consolidate confidence in their own resources and capacity within local communities and the growth of a form of social responsibility in the new (and future) generations through the enhancement and promotion of

sustainable development issues, with a view to real subsidiarity and active awareness of the actors involved.

The purpose that the establishment of the International Summer School intends to pursue is to realize a series of meetings, annually, to deal fully of the many facets that specifically identify the topics in question.

Objective of the International Summer School is to foster dialogue between universities Mediterranean, through the joint presence of teachers and students, so that participants can initiate an exchange of ideas and future visions and to share a field of experiences.

In this direction the training offer of the Summer School will feature intensive workshop aimed to overcome some urban and territorial projects, agreed in advance with the host local government and local actors in order to further operationalize the thematic treated by the scholars invited to present their speeches during the subsequent sessions of meeting.

Two formative paths:

Path a): Shaping the shorelines areas - *Cefalù*

Path a): Shaping the shorelines areas - *Petralia Soprana*

Topics covered during the training activities and applications:

- Regional rebalancing and land garrison
- Urban and suburban connections
- Local resources and integrated relational tourism
- Sustainable mobility and alternative transportations
- Public space and urban re-qualification in the Mediterranean Cities
- Supplied areas and land centralities
- Waste cycle, water and new energy sources
- Consumptions and sustainability in the Mediterranean Area

Proponents:

Facoltà di Ingegneria e Architettura - Università Kore di Enna
Consorzio Universitario della Provincia di Palermo

Patronage:

Local Authority of Campofelice di Roccella
Local Authority of Petralia Soprana

Partners:

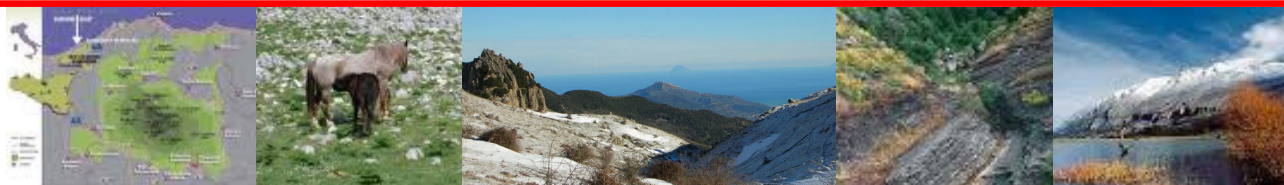

Faculty of Engineering, Department of Architecture - The British University in Egypt
Escola Tècnica Superior d'Arquitectura di Reus - Universitat Rovira i Virgili
Faculty of Engineering - Misr University for Science and Technology
Forum Algérien pour la Citoyenneté et la Modernité
COPPEM - Standing Committee for the Euro-Mediterranean Partnership of Local and Regional Authorities

Scientific Responsible and General Coordinator:

Prof. Ing. Giovanni Tesoriere - Università Kore di Enna

Scientific and Coordination Committee:

Prof. May Al-Ibrashy - The British University in Egypt
Prof. Chiara Baglione - Università Kore di Enna
Prof. Gianluca Burgio - Università Kore di Enna
Prof. Luigi Di Prinzio - Università IUAV di Venezia

Prof. Giuseppe Frisella - Consorzio Universitario della Provincia di Palermo
Prof. Hesham Gerisha - Misr University for Science and Technology
Prof. Gero Marzullo - Università Kore di Enna
Prof. Fabio Naselli - Università Kore di Enna
Prof. Ahmed Rashed - The British University in Egypt
Prof. Jordi Sardà i Ferran - Universitat Rovira i Virgili

Organizing Committee:

Prof. Gero Marzullo - Università Kore di Enna
Prof. Fabio Naselli - Università Kore di Enna

Teachers and Experts List:

Prof. May Al-Ibrashy - The British University in Egypt
Prof. Chiara Baglione - Università Kore di Enna
Prof. Luigi Di Prinzio - Università IUAV di Venezia
Prof. Hesham Gerisha - Misr University for Science and Technology
Prof. Angelo Lorenzi - Politecnico di Milano
Prof. Ali Shams El din - Benha University, Egypt
Prof. Ahmed Rashed - The British University in Egypt
Prof. Jordi Sardà i Ferran - Universitat Rovira i Virgili, Spain
Dott. Norddine Sbia - Forum Algérien pour la Citoyenneté et la Modernité
Dott. David Spizer - Shir & Spitzer Company, Israel

Prof. Gianluca Burgio - Università Kore di Enna
Prof. Gero Marzullo - Università Kore di Enna
Prof. Fabio Naselli - Università Kore di Enna

Didactic Tutors:

Arch. Alice Albanese - Università Kore
Ing. Alessandro Barracco - Università Kore
Arch. Giada Bini - Università di Palermo
Arch. Massimiliano Masellis - Università Kore

Places of works:

Path a): Shaping the shorelines areas - *Cefalù*
Comune di Cefalù

Path b): Shaping the inland areas - *Petralia Soprana*
Comune di Petralia Soprana

Length and time:

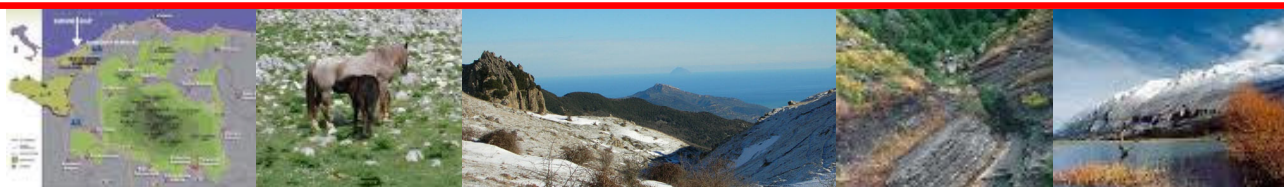

1st September 2010, at 10,00 am
Facoltà di Ingegneria e Architettura - Università di Enna Kore

Maximum number of participants:

30 participants

Total hours activities:

42 hours: consisting of six hours of daily activity starting from Wednesday 1st to Monday 6th September
(from 10,00 am to 2,00 pm and from 3,00 pm to 5,00 pm)

Schedule of activities:

01_09

Arrival of participants in Enna.
Opening Ceremony and Introduction to the work.
Organization of working groups.
Lunch.
Transfer to Cefalù and Petralia Soprana.
Dinner and city guided tour (respectively in Cefalù or in Petralia Soprana).

02_09

First session

Roundtable or workshop or lectures.
Lunch.
Activities of working groups led by work-shop responsible (guided tour to the project locations).
Dinner.

03_09

Second session

Roundtable or workshop or lectures.
Lunch.
Activities of working groups led by work-shop responsible (work-shop).
Joint guided tour in Parco delle Madonie.
Dinner.

04_09

Third session

Roundtable or workshop or lectures.
Lunch.
Activities of working groups led by work-shop responsible (work-shop).
guided tour for the work group in Cefalù and for the work group in Petralia Soprana.
Dinner.

05_09

Fourth session

Activities of working groups led by work-shop responsible (work-shop).
Lunch.
Activities of working groups led by work-shop responsible (work-shop).
guided tour for the work group in Cefalù and for the work group in Petralia Soprana.
Dinner.

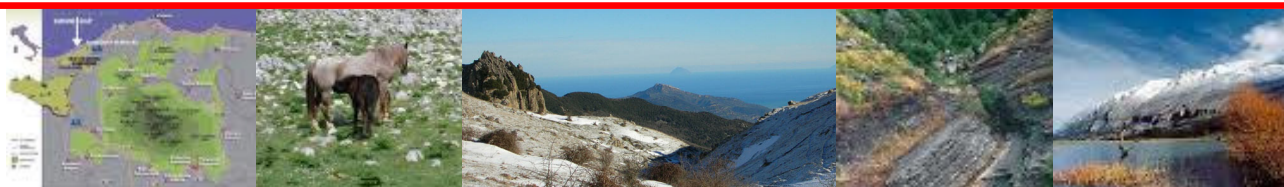

06_09

Fifth session

Activities of working groups led by work-shop responsible (work-shop).
Lunch.
Closing Roundtable with all participants and exhibition of project works (Petralia Soprana).
Closing ceremony and awarding of the certificates (Petralia Soprana).
Gala dinner.

07_09

Return of the participants in their own locations or, in alternative, to Kore University to discuss future agreements.

Articulation of activities and formative curriculum:

Summer School activities are divided into two parallel training courses:

Path a): Shaping the shorelines areas - Cefalù

Path b): Shaping the inland areas - Petralia Soprana

The program of the Summer School takes place in five days of training and application activities that are closed with a final presentation of results. The formative curriculum is divided into classroom lectures and speeches, seminars and panel discussions, guided visits and laboratory exercises.

The first day is dedicated to the introduction on the general themes and specific objectives of both training and the division of participants into working groups. The next two days will be devoted to lectures, to round tables discussion on the proposed themes, guided tours and lab work in the classroom. The fourth will be a day dedicated to the laboratory.

Work done in the laboratory will be presented during the fifth and final day of activities and will conclude with a final round table with all participants.

Participants are supported by four mentors who will follow them the entire path of the workshop.

The workshop is activity that occupies the most hours and has the objective of providing the opportunity for a practical application of the theories set out in classroom and discussed in comparison between participants, tutors and teachers.

Conditions for participation and admission requirements:

The Summer School is addressed to the participation of a **maximum of 30 students**.

It is open to graduates and students of degree courses in Architecture or Civil Engineering, any field, coming from any of partners.

Will be allowed with priority 10 participants for each of the partner universities, ranked in chronological order of submission of applications accompanied by documentation.

The outline of the application form with the list of required documents, in Italian and English, can be downloaded from the Faculty of Engineering and Architecture, University of Enna Kore:

(http://www.unikore.it/index.php?option=com_content&tsk=blogcategory&id=108&Itemid=1863).

Rank:

The selection of participants will be carried out according to a ranking compiled in chronological order of dispatch of documentation required, according with the suggested of 10 participants for each partner universities.

The full list of successful candidates will be published on the website of the Faculty of Engineering and Architecture, University of Enna Kore:

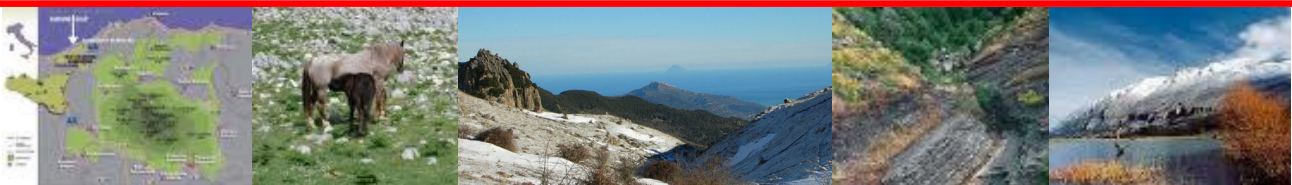

(http://www.unikore.it/index.php?option=com_content&tsk=blogcategory&id=108&Itemid=1863) by the date of **10 August 2010**.

The list will be considered final after after confirmation of payment of the fee or following any eventual notices of cancellation. In the latter case will be entitled to take over the candidates included after on the list then that will be notified by e-mail from the day **21 August 2010**.

The list published on the website will be considered to all intents and purposes, as official notification. the candidate will not receive future communications and he declare informed about the activities of registration and participation.

Participation fee and organization costs:

The cost for the participation fee is set at **€ 350,00** (Three hundred and fifty /00) and must be paid, after having had the confirm on the position in the list published, on the bank account of the Faculty of Engineering and Architecture, University of Enna Kore, which acts as a single expense centre.

The costs for registration, insurance, materials, local transport, stay, food and the issuance of Certificate, are included in the fee.

Details of bank account, make payments on which are:

Name: *Università Kore di Enna - Facoltà di Ingegneria e Architettura*

Bank: *Banca Nuova*

IBAN Code: *IT47Y0513216800847570220353*

Codice SWIFT: *BPV2IT3T847*

For payment shall be indicated as a cause:

"Fee for the First International Summer School 2010".

Registration:

The outline of the application form, In Italian and English language, with the list of required documents can be downloaded from the website of Faculty of Engineering and Architecture, University of Enna Kore: (http://www.unikore.it/index.php?option=com_content&task=blogcategory&id=108&Itemid=1863).

Applicants must submit the application form with the required documents by e-mail address: info.summerschool@unikore.it within **12:00 pm of 30 July 2010**.

The candidate selected and usefully in the ranking must adjust the payment of the fee within and not beyond **12:00 pm of 17 August 2010**, and then send a copy of the payment to the email address info.summerschool@unikore.it within and not beyond **12:00 pm of 20 August 2010**.

Certificate and formative credits:

At the end of the activities will be provided a Certificate of Participation in the Summer School, issued by the Università Kore di Enna.

Participation to the summer school includes the recognition of **n. 3 formative credits**.

Organizing Secretariat:
